

Weight Gain Plan

Build healthy mass with a structured strength and nutrition approach.

1-Week Plan

Overview

This plan emphasizes progressive overload on compound lifts paired with a calorie surplus, so the extra weight you gain is mostly muscle, not just fat.

Daily Schedule

Day 1 - Lower Body Strength

Exercise	Sets	Reps / Duration
Squats (bodyweight or loaded)	4	10-12
Romanian Deadlifts	3	10
Walking Lunges	3	12 each leg
Calf Raises	3	15
Plank Hold	3	30-45 sec

Day 2 - Upper Body Push

Exercise	Sets	Reps / Duration
Push-ups or Bench Press	4	10-12
Dumbbell Shoulder Press	3	10-12

Tricep Dips	3	10-12
Lateral Raises	3	12

Day 3 - Rest / Light Walk

Exercise	Sets	Reps / Duration
Easy Walk or Mobility Work	1	15-20 min

Day 4 - Upper Body Pull

Exercise	Sets	Reps / Duration
Dumbbell / Barbell Rows	4	10-12
Pull-ups or Assisted Pull-ups	3	6-10
Bicep Curls	3	12
Face Pulls or Band Rows	3	15

Day 5 - Full Body Strength

Exercise	Sets	Reps / Duration
Deadlifts (light to moderate)	4	8
Goblet Squats	3	12
Overhead Press	3	10
Chest-Supported Rows	3	12

Day 6 - Light Cardio + Core

Exercise	Sets	Reps / Duration
Easy Cycling or Walk	1	15-20 min

Hanging Leg Raises	3	12
Weighted Plank	3	30-45 sec

Day 7 - Rest

Exercise	Sets	Reps / Duration
Full Rest	-	-

Nutrition Guidelines

- Eat in a calorie surplus of roughly 250-500 kcal above maintenance for steady, lean gains.
- Aim for about 1.6-2.2 g of protein per kg body weight daily, spread across 3-4 meals.
- Don't neglect carbs - they fuel your lifts and support recovery between sessions.
- Add calorie-dense, nutritious foods like nuts, nut butter, whole milk, and olive oil if you struggle to eat enough.
- Eat a balanced meal within 1-2 hours after training to support muscle recovery.

Key Tips

- Progressive overload is key - gradually increase weight, reps, or sets over time.
- Weigh yourself weekly (same day, same time) and track the trend, not daily fluctuations.
- Prioritize sleep and recovery; muscle is built during rest, not just during training.

General guidance only - not a substitute for advice from a qualified coach, trainer, or doctor. Listen to your body and adjust intensity as needed.
