

Weight Loss Plan

Burn fat, build a leaner physique, and boost your metabolism.

30-Day Plan

Overview

This plan combines strength training with metabolic conditioning to maximize calorie burn while preserving muscle. Consistency and a moderate calorie deficit matter more than any single workout.

Your Weekly Training Split

Repeat this 7-day split each week for the full program, adjusting effort according to the phase guide below.

Day 1 - Full Body Strength

Exercise	Sets	Reps / Duration
Bodyweight Squats	3	15
Push-ups (knee or full)	3	10-12
Dumbbell Rows	3	12
Walking Lunges	3	12 each leg
Plank Hold	3	30-45 sec

Day 2 - Cardio + Core

Exercise	Sets	Reps / Duration
Brisk Walk / Jog	1	20-25 min
Mountain Climbers	3	30 sec
Bicycle Crunches	3	20
Russian Twists	3	20
Standing Side Bends	2	15 each side

Day 3 - Active Recovery

Exercise	Sets	Reps / Duration
Light Stretching / Mobility	1	15-20 min
Easy Walk	1	20 min

Day 4 - HIIT Circuit

Exercise	Sets	Reps / Duration
Jumping Jacks	4	30 sec on / 15 sec off
Bodyweight Squats	4	30 sec on / 15 sec off
High Knees	4	30 sec on / 15 sec off
Push-ups	4	30 sec on / 15 sec off
Plank	4	30 sec on / 15 sec off

Day 5 - Upper Body + Core

Exercise	Sets	Reps / Duration
Dumbbell Shoulder Press	3	12
Tricep Dips (chair)	3	10-12

Bent-over Dumbbell Rows	3	12
Hanging or Lying Leg Raises	3	12
Side Plank	2	20-30 sec each side

Day 6 - Cardio Session

Exercise	Sets	Reps / Duration
Cycling / Brisk Walk / Jog	1	30 min
Cooldown Stretch	1	10 min

Day 7 - Rest

Exercise	Sets	Reps / Duration
Full Rest or Gentle Stretching	-	-

Progression Phases

Phase	Focus
Week 1	Foundation - learn the movements, use lighter effort,
Week 2	Build - increase effort/weight slightly, same exercises
Week 3	Progress - add reps or intensity where you feel strong
Week 4	Push - aim for your best effort, then take extra rest at

Nutrition Guidelines

- Aim for a moderate calorie deficit (roughly 300-500 kcal below maintenance) rather than extreme cuts.
- Prioritize protein (about 1.6-2.0 g per kg body weight) to protect lean muscle while losing fat.
- Fill half your plate with vegetables for volume and fiber without excess calories.
- Stay hydrated - aim for 2.5-3 liters of water daily, more on training days.
- Limit sugary drinks and ultra-processed snacks; they add calories without keeping you full.

Key Tips

- Track your progress with photos and measurements, not just the scale - water weight fluctuates daily.
- Sleep 7-8 hours a night; poor sleep is linked to slower fat loss and stronger cravings.

- Progress gradually - small, sustainable changes beat drastic ones that are hard to maintain.

General guidance only - not a substitute for advice from a qualified coach, trainer, or doctor. Listen to your body and adjust intensity as needed.
